

## Proof of Measles Immunity for Employment

### Submitting Proof of Immunity

Per Western policy, all new hires must submit proof of measles immunity within 60 days of their start date. There are three ways to submit this verification:

1. A copy of a medical provider vaccination record sheet or a copy of an official immunization card showing the administration dates of the two required individual vaccinations for MMR.
2. A copy of a positive blood test result for antibodies against RUBEOLA.
3. Verification from a Health Care Provider that you have received the appropriate vaccines for RUBEOLA measles, and the dates they were administered.

If submitting verification of vaccination, please make sure that the two doses were given:

- After January 1, 1968
- At least 30 days apart, and
- On or after 12 months of age

When you are ready to submit your verification, please use the [Vaccination Submission Form](#), and attach your documentation.

### Exceptions

**If you were born on or before 01/05/1957, you do not need to complete this form. Former students and/or former employees should already have this documentation on file. If you are not sure we can check for you.**
